57 years

10 months of treatment

Right breast cancer

In December 2019 I started doing the exams that all of us as women are used to doing (mammography); they gave me results.

In February 2020 they told me that I had to do an ultrasound, from there they told me that they saw a small lump and that I should have a biopsy. They gave me the biopsy and the result were: Grade 2 - infiltrating Ductal carcinoma.

My son who was a patient of Dr. Omar Moreno asked me to see him before I went to the oncologist.

I started with Dr. Moreno in March 2020; healthy raw food (DEAR Menu), extremely strict, with great faith in God and in the recommendations of Dr. Moreno.

On April 2nd, 2020, the oncologist indicated 16 chemo, 4 red and 12 white; I followed all the recommendations of Dr. Moreno so that at the time of the chemo my body was strong.

They detected 2 lumps in the nipple and lymph nodes. They put me on the first red chemo on May 25th, 2020 and at 21 days they planned to give me the next dose. There was no need for that dose as the nipple tumor had faded away. They gave me 4 white doses; on September 17 I no longer had any tumor. I did not lower the hemoglobin, the symptoms due to the chemo did not increase due to the recommendations, the DEAR menu and the psycho-somatic control techniques suggested by Dr. Moreno.

As a patient of Dr. Moreno, I recommend all his indications as they renew our body and mind.

On February 3rd, 2021 I had a total mastectomy surgery; they found no cancer and no affected lymph nodes. I am healthy, I trust God.

Dr. Moreno is an excellent Naturopath; I ask God to continue blessing him in health so that he can continue to contribute his knowledge to other people.

I authorize Dr. Moreno to tell my story; we must learn that food and faith in God is the opportunity to be healthy.

Thanks

Martina Estribí
